

Windows

Adding VPN Connections to Windows 10/11 with Powershell

Enter the following command as an administrator (for all users) within Powershell, and omit the -AllUser portion for a user-based VPN connection:

SSTP, MsChapV2 - All Users (run as administrator):

```
Add-VpnConnection -Name "Corporate VPN" -ServerAddress "corpvpn.mycorp.com" -TunnelType SSTP -AuthenticationMethod MsChapv2 -RememberCredential -SplitTunneling -AllUser
```

SSTP, MsChapV2 - User Only:

```
Add-VpnConnection -Name "Corporate VPN" -ServerAddress "corpvpn.mycorp.com" -TunnelType SSTP -AuthenticationMethod MsChapv2 -RememberCredential -SplitTunneling
```

SSTP, PAP - All Users (for Duo):

```
Add-VpnConnection -Name "Corporate VPN" -ServerAddress "corpvpn.mycorp.com" -TunnelType SSTP -AuthenticationMethod MsChapv2 -RememberCredential -SplitTunneling -AllUser
```

To remove a VPN connection:

```
Remove-VpnConnection -Name "Corporate VPN"
```
