Fix Loud Fans on Dell XPS 8930

Bothered by the constant loud fan noise emanating from your Dell XPS 8930 tower? I know I was. The constant up down of the fans, sometimes spinning full blast on minor CPU usage.

I found [this article](#) which pointed to the fix, which seems to work!

Start

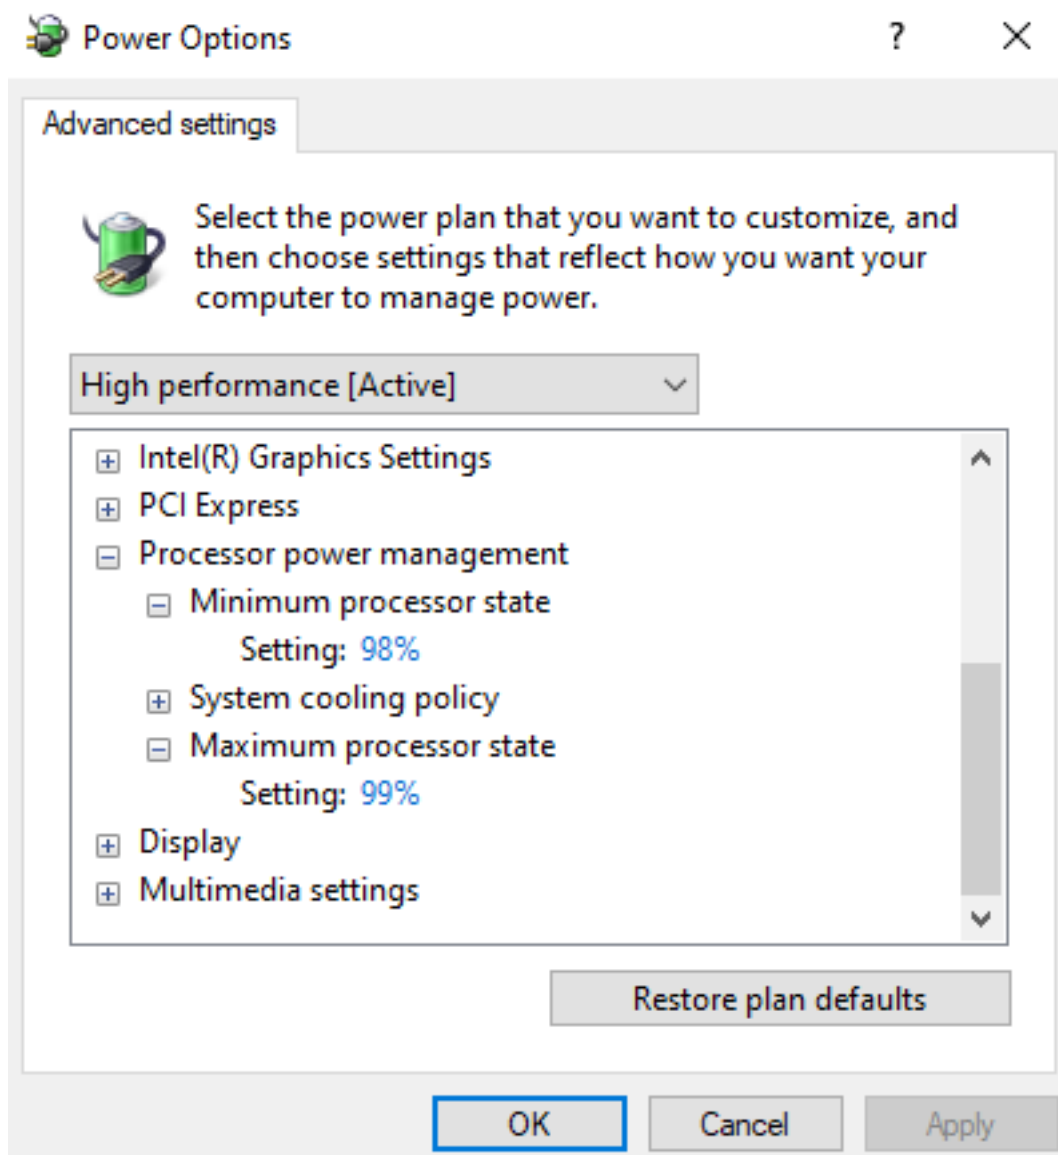

Control Panel

Power Options

Change plan settings on whatever plan you have selected

Change advanced power settings

Scroll down to Processor power management and set your minimum and maximum processor state values like so:
